

# 2008 SUMMARY REPORT

## Commercial Feed Inspections

PLANT INDUSTRIES DIVISION  
BUREAU OF FEED AND SEED

# **Missouri Department of Agriculture Mission Statement**

---

To serve, promote, and protect the agricultural producers, processors,  
and consumers of Missouri's food, fuel, and fiber products.

## **Bureau of Feed and Seed 2008 Feed Program Review**

The Missouri Department of Agriculture, Plant Industries Division, Bureau of Feed and Seed is pleased to supply this 2008 Summary Report of Commercial Feed Inspections. It is hoped this summary will be used as a reference and will be of help in making improvements to your products.

Food safety issues continued to play a very important role in the Feed Program in 2008. To that end, Missouri Department of Agriculture, Bureau of Feed and Seed Inspectors have undergone training and become certified as Federal Department of Agriculture BSE Inspectors. These inspectors are charged with the task of providing inspection and surveillance for the BSE – Bovine Spongiform Encephalopathy (Mad Cow Disease) -Prevention Program. We continue our concentrated effort to ensure all facilities in Missouri that manufacture and/or distribute feed products containing prohibited mammalian protein were labeled as “Do Not Feed to Cattle or Other Ruminants”, in compliance with Federal Rule 21 CFR Part 589.

The Bureau of Feed and Seed, in cooperation with the Plant Pest Program and the USDA, obtained samples from Missouri’s 2008 wheat production that were tested for karnal bunt wheat disease. No evidence of karnal bunt was found in Missouri.

The Bureau of Feed and Seed conducted an annual survey of corn and milo produced in the state. Corn was tested for crude protein and aflatoxin and milo for crude protein. If a sample of corn was found to contain aflatoxin, the level and FDA guidelines for safe use or disposal were sent immediately to the facility where the sample of corn was obtained. The 2008 corn and milo results are reported in this summary.

In June 2002, the Bureau of Feed and Seed started GMP (Good Manufacturing Practices) inspections of non-federally licensed medicated feed manufacturing establishments. Since that time, we have contracted with FDA perform Federal GMP inspections in Missouri. These inspections are a vital part of our food safety initiative for all animal feed. It is essential that animal feed is safe to ensure the safety of food for human consumption. The program is intended to ensure legally approved levels and combinations of drugs and antibiotics are used in feed products and that the overall upkeep, housekeeping, records, labeling, and cleanliness of the facility are in order.

The Bureau of Feed and Seed maintained a 100 percent follow-up rate by immediately responding to customer complaints. When problems were suspected that were beyond the scope of the feed program or the capabilities of the Missouri Feed Control Laboratory, other agencies were contacted or the samples were sent to other laboratories for testing.

The Bureau of Feed and Seed took regulatory action against a number of unlicensed companies or those who failed to file tonnage reports. These actions are reported in “Violations Other Than Failure to Meet Label Claims”.

Food safety is a primary concern of the Bureau of Feed and Seed.

The Missouri Feed Control Laboratory reported results on 4,565 official samples in 2008. An official sample is a product or feed ingredient on which a guaranteed analysis is required. Should a product fail to meet a guarantee or something of a detrimental nature is found, a Withdrawal from Distribution Order is issued immediately. There were 635 withdrawals issued in 2008 which resulted in a statewide compliance rate of 86.09%.

The Missouri Feed Control Laboratory analyzed 29 customer-formula samples in 2008. No regulatory action is taken against these feeds, however, the customer requesting the feed and the manufacturer of the feed received a report of the analysis. In addition, the customer received a questionnaire to ensure the quality of feed requested was received.

A total of 351 service and complaint samples were analyzed in 2008. The total number of samples analyzed by the Missouri Feed Control Laboratory was 4,945, resulting in 50,905 individual assays in 2008.

The Excellence in Compliance Award Program was continued in 2008. A total of 109 guarantor companies qualified for this award.

In 2008, the Bureau of Feed and Seed has been confronted with increasing responsibilities and a lack of personnel. Perhaps our biggest challenge has been training for and adapting to the FDA inspection procedures. The good news is that increased revenue from our FDA contract made it possible to hire a fifth Feed and Seed Inspector. An extra inspector means smaller territories for each inspector to cover, and therefore, more time to spot and investigate potential problems and to assist individual facilities with compliance or labeling problems as needed. Our goal has been, and will continue to be, to serve, promote, and protect our agricultural producers, processors and consumers of Missouri's food, fuel, and fiber products.

## Federal BSE-GMP Agreement

The Missouri Department of Agriculture, Bureau of Feed and Seed entered into a cooperative agreement with the U.S. Food and Drug Administration (FDA) to do federal Bovine Spongiform Encephalopathy (BSE) and Good Manufacturing Practices (GMP) inspections. Our inspectors underwent training and are now certified to perform inspections as Federal Department of Agriculture BSE Inspectors. The first contract period ran October 1, 2007 – September 30, 2008. During that time, 61 FDA inspections were performed in Missouri with that information forwarded to the FDA office in Kansas City. An additional 17 state BSE inspections were performed in keeping with our goal of checking compliance every six months at facilities handling prohibited mammalian protein.

## **U.S. Food and Drug Administration Guidelines for Aflatoxin Levels**

Corn containing less than 20 parts per billion aflatoxin is considered safe by the U.S. Food and Drug Administration for use in all animal feed. Corn exceeding 20 ppb can be fed only for specific age, weight, and production stage. Corn exceeding 300 ppb must be blended with corn containing little or no aflatoxin before feeding is allowed to specific age, weight, and production stage of livestock. Before corn can be blended for out-of-state shipment, the U.S. Food and Drug Administration must be notified and permission obtained from the Missouri Department of Agriculture for this to be allowed.

U.S. Food and Drug Administration guidelines are as follows:

Aflatoxin Level (in parts per billion)	Commodities & Species
20 ppb	For corn, peanut products, cottonseed meal and other animal feeds and feed ingredients intended for dairy animals; for animal species or uses not specified below, or when the intended use is not known.
20 ppb	For corn, peanut products and other animal feeds and feed ingredients, but excluding cottonseed meal, intended for immature animals.
100 ppb	For corn and peanut products intended for breeding beef cattle, breeding swine or mature poultry (e.g. laying hens).
200 ppb	For corn and peanut products intended for finishing swine (100 pounds or more).
300 ppb	For cottonseed meal intended for beef cattle, swine or poultry (regardless of age or breeding status).
300 ppb	For corn and peanut products intended for finishing beef cattle (i.e., feedlot cattle).

## 2008 Corn and Milo Survey

The Missouri Department of Agriculture is happy again to report the results on our annual monitoring of aflatoxin in corn. This survey has been reported yearly since 1993. We also analyze all customer complaint samples for aflatoxin when symptoms suggest adulteration. Laboratory tests are conducted to determine the average crude protein in corn and milo. In 2008, the average crude protein for corn was lower at 7.35%. The crude protein value for milo was also lower with an average of 7.58% overall. Each sample was adjusted to a 13.5% moisture level.

Samples of corn are drawn from counties having an expected production of greater than one million bushels, with one sample added for each additional two million bushels produced. Aflatoxin was found in 7 of the 149 samples tested. The values reported were in a range from 10-60 ppb. Each time aflatoxin was found, the facility where the sample was taken was notified immediately and FDA guidelines for safe use or proper disposal were supplied.

Twenty-seven (27) milo samples were collected from 13 counties. Since aflatoxin in milo has not been a concern in the past, analysis for aflatoxin was not performed.

The Missouri Department of Agriculture is committed to food safety and quality for the protection of our state's consumers. Our mission is to continue to serve, promote, and protect the agriculture producers, processors and consumers of Missouri food, fuel and fiber products.

Crude Protein Summary by Year																
	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008

Findings (ppb)	5	1	1

## 2008 STATISTICAL SUMMARY

### Total Number of:

Commercial feed licenses issued	1,820
Small package pet and specialty pet food products	4,739
Unpaid products over the maximum fee per labeler	188
Formula feed sold (tons)	1,601,069
Feed ingredients sold (tons)	4,279,687
Feed inspections by inspectors*	1,240
Official labeled samples	4,645
Guaranteed claims tested and reported	24,025
Non-guaranteed claims tested and reported	3,499
Withdrawal from distribution orders issued	635
Custom mix samples	29
Nutrients tested and reported	192
Service samples	351
<u>Nutrients tested and reported</u>	<u>911</u>
TOTAL SAMPLES TESTED	4,945
TOTAL VALUES REPORTED	28,821
TOTAL TESTS PERFORMED	50,905

\*A feed inspection is defined as one inspection for each facility visited where a “notice of inspection” is written indicating the type of regulatory action taken.

## **Excellence in Compliance Award**

The Excellence in Compliance Award is designed to recognize those companies who have high standards and have met or exceeded a 90 percent rounded average compliance in 2008.

The Missouri Department of Agriculture will issue a certificate to honor those companies that have met or exceeded the following criteria:

- At least five random official regulatory samples must have been taken by a Missouri Feed and Seed inspector and been analyzed by the State Feed Control Laboratory in 2008.
- A 90 percent passing compliance rate on five or more samples must have been achieved for the 2008 calendar year.
- The company labeling the feed or feed ingredient must be in good standing with the Bureau of Feed and Seed retain a Missouri Commercial Feed License and have all quarterly inspection fees or yearly product listing (pet and specialty pet foods) paid as required.

A total of 109 feed labelers have achieved a 90 percent or better compliance rate in Missouri in 2008.

Seventy-two of these companies maintain an address in the state of Missouri and 37 are located outside of Missouri. A number of companies with out-of-state addresses have manufacturing facilities in Missouri.

Congratulations go to the following companies in alphabetical order:

<b>Company Name &amp; Address</b>	<b>Number of Samples Analyzed</b>	<b>Compliance Rate</b>

## SECTION 1

Section One is intended to show the reliability of labelers in meeting their claims for feed quality. Inspections were planned on a random basis. The greater the number of samples taken per labeler, the greater the probability that the consistency in meeting claims shown will represent how well the labeler met guarantees.
